TO WHOMSOEVER IT MAY CONCERN

ERPLogic, is a global business solutions Implementation and consulting company focused and erect SAAS based solution portfolio in exploiting the growing adoption of cloud computing in SMB Market.

We engaged first Global SAP Cloud Partner **Wharfedale Technologies**, Inc to handled all our SAP needs including Production, Development environment in SAP ECC, SCM (Supply Chain Management), IS-AFS Development.

Last two years of experience with **WFTCloud.Com** is simply outstanding and very proud to let everyone know 100% uptime with zero tolerance. We have reduced 70% of operating expenses in terms of maintenance Basis, DBA, back-up, etc in this environment and my Total cost of ownership minimized.

Past two years, I am not worried about my infrastructure and going forward also.

I would most strongly recommend the company and the leader, for other such assignments. I would definitely employ the company again and would most strongly recommend them to other companies implementing SAP

Sincerely,

Caldwell Velnambi
C.E.O/President
